DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, "the claimed steps for linear combining, finding the maximum of the linear combination and determining the code word and cyclic shift in claim 1" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000.

Art Unit: 2631

Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Sarkar (US patent number 6,263,060).

Sarkar teaches a receiver for receiving a digitally modulated CFC codes comprising steps for: despreading the received (receive3r (11 and 204 in figures 3 and 6); combining the correlated value of the CFC signal (404 fig. 8); and determining the maximum value of the combined correlated values and decode (406), claimed determine, the FCF and its cyclic shift as in claim 1.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patent numbers 6,226,315, 6,504,830 and 6,526,091 issued to Sriram et al., Ostberg et al. and Nystrom et al. respectively disclose a spread spectrum receiver having means for detecting CFC codes.
